📍 Seoul, South Korea

M.S. Student in Artificial Intelligence

SUMMARY

Research interests in **computer vision, machine learning, and multimodal AI**, with a focus on integrating visual data into **robotics and scientific applications**. Background in **industrial optical measurement software development**, including application modernization and integration projects.

EDUCATION

Chung-Ang University

Mar. 2026 – Present

M.S. in Artificial Intelligence, Visual Intelligence Lab

Seoul, South Korea

- Research focus: computer vision, machine learning, and multimodal AI
- Affiliated with Visual Intelligence Lab. Supervised by Prof. Jongwon Choi

Chung-Ang University

Mar. 2020 – Feb. 2026

B.A. in Art & Technology

Anseong, South Korea

- GPA: 3.5/4.5
- **Relevant Coursework:** Image Processing and Vision (A), Intelligent Vision (A+), Data Representation and Algorithm (A), Object Oriented Programming (A), Advanced Programming (A+), Advanced Visual Effects Technique (A)

EXPERIENCE

Chung-Ang University, Ministry of National Defense

April. 2026 – June. 2026

Teaching Assistant, Military AI Educational Program

Seoul, South Korea

- Python programming for military personnel

Chung-Ang University, Visual Intelligence Lab

Sept. 2025 – Feb. 2026

Undergraduate Research Intern

Seoul, South Korea

- Worked as an undergraduate research intern in the Visual Intelligence Lab
- Participated in research related to **machine learning** and **computer vision**
- Built foundational research experience for graduate study in artificial intelligence

Asem

Jun. 2024 – May 2025

IT Consultant

Seoul, South Korea

- Worked at an optical metrology engineering company on **application modernization** and **software integration** projects
- Contributed to engineering software development in industrial environments using **Python, C++**, and **Qt**
- Supported modernization of existing operating software and integration of production-oriented applications

PROJECTS

AI for Cultural Heritage Understanding

Mar. 2026 - Present

- Participating in a Ministry of Culture, Sports and Tourism funded R&D project
- Investigating human-in-the-loop and explainable AI approaches for efficient heritage data annotation
- Exploring visual-language models for semantic understanding and knowledge integration of heritage assets

Application Integration

Feb. 2025 – May 2025

- Integrated operating software for an optical metrology engineering company
- Contributed to software used for industrial clients including **Meta Korea**
- Tech stack: **Qt, Python, C++**

Application Modernization

Jun. 2024 – Nov. 2024

- Modernized operating software for an optical metrology engineering company
- Worked with **Qt** and **Python** in an industrial software environment
- Detailed project information withheld under NDA

CERTIFICATIONS

Dacon <i>Machine Learning Intermediate</i>	Feb. 2025 South Korea
Programmers <i>PCCP LV.3</i>	Dec. 2025 South Korea

SKILLS

Programming Languages: Python, C++, SQL, MEL (Maya Embedded Language)
Languages: Korean (Native), English (Intermediate), Japanese (Beginner)

RESEARCH INTERESTS

Computer Vision, Deep Learning, Machine Learning, Multimodal AI for medical and scientific applications
