Seoul, South Korea

M.S. Student in Artificial Intelligence

SUMMARY

Research interests in **computer vision, machine learning, and multimodal AI**, with a focus on integrating visual data into **robotics and scientific applications**. Background in **industrial optical measurement software development**, including application modernization and integration projects.

EDUCATION

Chung-Ang University Mar. 2026 – Present
M.S. in Artificial Intelligence, Visual Intelligence Lab Seoul, South Korea

- Research focus: computer vision, machine learning, and multimodal AI
- Affiliated with Visual Intelligence Lab. Supervised by Prof. Jongwon Choi

Chung-Ang University Mar. 2020 – Feb. 2026
B.A. in Art & Technology Anseong, South Korea

- GPA: 3.5/4.5
- **Relevant Coursework**: Image Processing and Vision (A), Intelligent Vision (A+), Data Representation and Algorithm (A), Object Oriented Programming (A), Advanced Programming (A+), Advanced Visual Effects Technique (A)

DOMESTIC PAPERS

Relational Graph Convolutional Networks for Anomalous Attribute Detection in Cultural Heritage Knowledge Graphs

Seungmin Park, Kanghee Lee, Jongwon Choi (corresponding author)
The Korean Institute of Broadcast and Media Engineers (KIBME)
Poster
Presentation date: November 19, 2026

INTERNATIONAL PAPERS

No papers listed yet.

EXPERIENCE

Chung-Ang University, Ministry of National Defense April. 2026 – June. 2026
Teaching Assistant, Military AI Educational Program Seoul, South Korea

- Python programming for military personnel

Chung-Ang University, Visual Intelligence Lab Sept. 2025 – Feb. 2026
Undergraduate Research Intern Seoul, South Korea

- Worked as an undergraduate research intern in the Visual Intelligence Lab
- Participated in research related to **machine learning** and **computer vision**
- Built foundational research experience for graduate study in artificial intelligence

Asem Jun. 2024 – May 2025
IT Consultant Seoul, South Korea

- Worked at an optical metrology engineering company on **application modernization** and **software integration** projects
- Contributed to engineering software development in industrial environments using **Python**, **C++**, and **Qt**
- Supported modernization of existing operating software and integration of production-oriented applications

PROJECTS

AI for Cultural Heritage Understanding

Mar. 2026 - Present

- Participating in a Ministry of Culture, Sports and Tourism funded R&D project
- Investigating human-in-the-loop and explainable AI approaches for efficient heritage data annotation
- Exploring visual-language models for semantic understanding and knowledge integration of heritage assets

Application Integration

Feb. 2025 – May 2025

- Integrated operating software for an optical metrology engineering company
- Contributed to software used for industrial clients including **Meta Korea**
- Tech stack: **Qt**, **Python**, **C++**

Application Modernization

Jun. 2024 – Nov. 2024

- Modernized operating software for an optical metrology engineering company
- Worked with **Qt** and **Python** in an industrial software environment
- Detailed project information withheld under NDA

CERTIFICATIONS

Dacon Feb. 2025
Machine Learning Intermediate South Korea

Programmers Dec. 2025
PCCP LV.3 South Korea

SKILLS

Programming Languages: Python, C++, SQL, MEL (Maya Embedded Language)
Languages: Korean (Native), English (Intermediate), Japanese (Beginner)

RESEARCH INTERESTS

Computer Vision, Deep Learning, Machine Learning, Multimodal AI for medical and scientific applications
